01. LIGHT MACHINERY AND EQUIPMENT RENTAL SERVICES

02. OTHER COMPLIMENTARY SERVICES

Certain customers may also choose to purchase brand new light machinery and equipment . We are able to source from various light machinery and equipment suppliers which we then sell to our customers.

The brands that we offer include, but are not limited:

AIRMAN®

Atlas Copco

Denyo®

Miller®

HISAKI

TOKU™

Our Group typically maintain a minimum inventory level for commonly purchased light machinery and equipment such as generator and tower light. Additionally, for any customer order for light equipment and machinery that we do not supply, we will then source from other suppliers to fulfil the order.

Upon the expiry of a product warranty, we are also able offer after-sales services such as repair, maintenance and technical support services.

03. SUPPORT SERVICES

The support services that we provide are as follows:

Repair and maintenance services

We provide on-demand preventive repair and maintenance services including regular service, attending to breakdown and replacement of certain spare parts such as air filter, oil filter, lubricant and batteries to third parties of our trading customers whose products are no longer covered by warranty.

We also provide value-added preventive repair and maintenance services which includes machinery refurbishment such as fabrication and painting works.

Supply of spare parts and consumables

As part of our on-demand repair and maintenance services, we also supply machinery spare parts and consumables. We keep an inventory of general machinery spare parts and consumables such as hoses, battery, lamps and bulbs, sparks arrestors and lubricants.

This is also part of our repair and maintenance services to provide timely parts replacement to our customers as well as to reduce downtime of the operations of their fleet of light machinery and equipment.

Transportation services

We provide transportation services for our fleet of light machinery and equipment to our customers' designated locations within Peninsular Malaysia.

Our charges depend on the type of light machinery and equipment, the type of transport used and the delivery location.

Certificate application

Depending on our customer's project requirements, certain sites might require generators to be certified by the Energy Commission of Malaysia. On request basis by our customers, we assist our customers in the preparation of such certification applications.

Other than Energy Commission of Malaysia, we also offer our services to other authorities such as Ministry of Energy and Natural Resources for oil and gas industry and magnetic particle inspection certification.

We charge one-off fees for these services.

TTL

WHAT THEY SAY!

Farith Ikmal recommends **TTL Group of Companies**.
2 April 2021 ·

The process of renting a compressor was done quite smoothly, very friendly yet helpful staffs, starting from the sales representative until the driver that delivers the compressor. Worth paying for such machine and service.

Truly recommend TTL to any companies that is looking to purchase or rent compressors.

Edwin Ch'ng recommends **TTL Group of Companies**.
25 February 2022 ·

Just bought a compactor from TTL
Good service, fair price and fast response...
